

HERBAL EXTRACT INFORMATION AND GUIDELINES

Herbal extracts are a convenient to use, excellent alternative to herbal teas or capsules. Herbal extracts are the medicinal properties of herbs extracted into fluids. These offer the advantage of being more readily available to the body, since they represent the soluble or dissolved portion of the herb. These herbal extracts are highly concentrated from the highest quality herbs available. As such, they retain all the characteristics of the whole herb – the aroma, color, taste and effect. These herbal extracts are made by a cold process method that extracts the maximum amount of vitamins, minerals, and active constituents of the herb. This extensive line of extracts features Fresh, Wildcrafted (WC), and Certified Organic (CO) varieties, all grown in compliance with the National Organic Program. Certified organic grain alcohol is used, resulting in a 100% Certified Organic product. Certified Organic grain alcohol used with water effectively extracts each herb's chemical components and preserves them from spoiling. Herb strength (concentration ratio) represents the amount of herb in each extract. The concentration ratio is usually expressed as a weight to volume relationship. So, for example, herb strength of 1 to 2 contains 1 part herb for each 2 parts solvent. A 1 to 1 extract contains equal parts. We also have some Alcohol Free Glycerites Extracts (AF) made with a vegetable glycerine base. Extracts are available in a 1 ounce (30 ml) amber bottle with a fitted neck dropper insert and a tamper-evident, childproof lid. The 4-ounce bottle is amber with a screw on top. Larger sizes are available upon request.

NOTICE: The use of ANY botanical extract requires adequate information. Adequate research and study is YOUR individual responsibility. Everyone's body chemistry and sensitivity is different, pay attention to your body. Follow guidelines for usage frequency and amount given in herbal reference material. Some herbal extracts can react adversely with medications. If you are on medications check with your health care practitioner before taking herbal extracts. Please consult trained professionals before using or administering any herbal extracts that are unfamiliar or new to you. Please check the numbered warnings and refer to our Herbal Safety Data Sheet. We sell the highest quality extracts we can locate. They are perhaps more potent than your previous experiences with similar products purchased elsewhere. Be cautious in usage. Please consult reference material and trained professionals before beginning ANY course of administration or usage. We assume no responsibility for improper usage.

LIQUID HERBAL EXTRACTS

NAME	SIZE	WARNINGS	PRICE
Angelica Root CO	1 oz	4, 10, 11, 37	\$8.20
Angelica Root CO	4 oz	4, 10, 11, 37	\$21.80
